

Bot System Audit — Methodology ENGAGEMENT

Independent review of multi-department support-automation bots · evidence-based, scaling-safe

1 — HOW THE AUDIT RUNS

2 — THE 8 AUDIT DIMENSIONS

Evidence, not opinion — every finding has a reproduced example, impact and effort estimate

Scaling-safe — roadmap is sequenced so workflows are hardened before more automation is added

Independent — external review surfaces what the internal team stopped seeing

Framework & sample report: github.com/waseem253/bot-system-audit
